

## Alpha Systems AOA Presents AV16 Special Event Coverage... With Attitude!

Sat, Jul 30, 2016

### Alpha Systems AOA – A Lifesaver For Today's Aviator

It doesn't get much more important than this... "I am committed to saving lives in the General Aviation community with our Angle of Attack product. We will continue to strive to make the best products at reasonable prices that will benefit pilots." - Mark Korin, Alpha Systems AOA, CEO / President Alpha Systems is proud to announce new features

and kits for EAA Oshkosh 2016! With 19 years of continual innovations, listening to the needs of thousands of pilots, flight instructors and OEM's to solve the most pressing problem in the General Aviation community; Stall/spin accidents.

The Alpha Systems AOA team has created new features for the current family of AOA products with the addition of an I/O module. This I/O module allows for up to 4 digital discrete flap inputs, 1 analog input for flap position sensing with 3 adjustable set points. Another new feature for 2016 is the aircraft gear down advisory input with audio warning based on AOA.

The Alpha Systems AOA now has 6 pilot selectable audio annunciations with an option for variable pitch/frequency changes for increasing AOA awareness with clear audio cues.

Another innovation for 2016 is the Alpha Systems AOA now comes standard with RS232 streaming, real time calibrated AOA ready to feed any PFD company that has AOA equipped input!

 \*When Dual AOA Kit and Dual Valkyries are purchased

We're very excited to announce, for those aircraft that have a certified AOA but no displays, the Alpha Systems AOA has just released a standalone AOA dual HUD dash mounted Eagle display system. This display system reads ARINC429 or RS232 AOA data and gives a pilot a visual of real time AOA indications from the existing installed equipment.

It takes a dedicated, ongoing engineering effort and constantly listening to the needs of the aviation community to make the very best products focused on one thing, saving lives.

We are very proud to provide high quality Angle of Attack products at affordable prices that significantly improve situational awareness of available lift for every pilot in every aircraft. It is a never ending quest of Alpha Systems AOA to add innovations, improvements and features to make flying simpler and safer.
