“STANDARD” ELECTRONIC KITS

All of the Alpha Systems AOA electronic kits will work on aircraft with supply voltages of +12V DC to +28V DC and come complete with all parts including, AOA probe, mounting hardware, 9" X 9" mounting plate, fittings, 21' of 1/4" blue and white hoses, AOA interface module, display, prewired interconnect cables, installation and calibration manuals. With features such as 16 brightness levels, auto dim brightness circuitry, audio beeper, electronic pushbutton calibration. Additional display mounting options and audio headset interfaces available.

3 “STANDARD CLASSIC” DISPLAYS

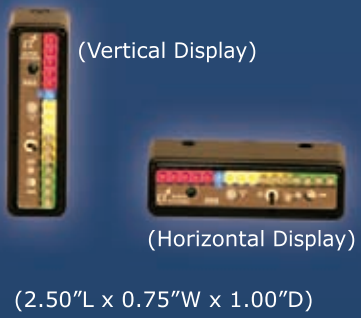

Kit Pictured with 4" Horizontal LED Display.

The "Standard Classic" line of AOA display kits incorporate 16 (5mm) ultra bright, colored LED readout of available lift when calibrated to the aircraft. 3 versions, round 2 1/4" panel mount, vertical and horizontal in-line bar graph display styles. The "Standard Classic" kits come with all parts needed to install in most aircraft without modifications.

- "Standard Classic" Horizontal 4" AOA Kit**
Retail Price \$895.00
- "Standard Classic" Vertical 4" AOA Kit**
Retail Price \$895.00
- "Standard Classic" Round 2 1/4" Panel Mount AOA Kit**
Retail Price \$895.00

2 “STANDARD ULTRA” DISPLAYS

Kit Pictured with Ultra 2 1/2" Vertical Display

The "Standard Ultra" line of AOA display kits have the same great features as the "Standard Classic" in a smaller more compact package. Kit features 16 (3mm) ultra bright colored LED's in both vertical and horizontal display versions housed in a billet aluminum case. Additional glare shield mounting options allow for the display to be mounted securely above the glare shield in the pilot's peripheral vision. The "Standard Ultra" kits come with all parts needed to install in most aircraft without modifications.

- "Standard Ultra" Vertical 2 1/2" AOA Kit**
Retail Price: \$1,150.00
- "Standard Ultra" Horizontal 2 1/2" AOA Kit**
Retail Price: \$1,150.00

“STANDARD LEGACY” AOA DISPLAY

Kit comes Standard with Instrument Panel Mount Brackets

The "Standard Legacy" line of AOA display kits utilize ultra bright LED driven colored segments to give the pilot AOA readout when calibrated to the aircraft. The "Standard Legacy" display is housed in a billet aluminum case and comes standard with panel mount brackets. Additional glare shield mounting options allow for the display to be mounted above the glare shield in the pilot's peripheral vision. Kit comes complete with all parts, documentation and connectors prewired for simple assembly.

- "Standard Legacy" Chevron AOA Kit**
Retail Price: \$1,460.00
