“ENHANCED” ELECTRONIC KITS

All of the Alpha Systems AOA electronic kits will work on aircraft with supply voltages of +12V DC to +28V DC and come complete with all parts including, AOA probe, mounting hardware, 9” X 9” mounting plate, fittings, 21’ of ¼” blue and white hoses, AOA interface module, display, prewired interconnect cables, installation and calibration manuals. With features such as 16 brightness levels, auto dim brightness circuitry, multiple audio tones / voice options with stereo audio panel interface. Display connector quick disconnect, electronic pushbutton calibration. Additional display mounting options available.

3 “ENHANCED CLASSIC” DISPLAYS

(2 ¼” Round Display) (Horizontal Display) (Vertical Display)
 (4.375”L x 1.00”W x 1.00”D)

Kit Pictured with 4” Horizontal LED Display.

The “Enhanced Classic” line of AOA kits incorporate the same great performance of the standard Classic kits plus an inline display disconnect connector, a direct stereo connection of a built-in audio interface system for multiple selectable tones or voice warnings. 16 (5mm) ultra-bright, colored LED readout of available lift when calibrated to the aircraft. 3 versions of the “Enhanced Classic” kits are available in a vertical and horizontal bar graph and a standard 2 ¼” panel mount display versions.

- “Enhanced Classic” Horizontal 4” AOA Kit
Retail Price \$1,050.00
- “Enhanced Classic” Vertical 4” AOA Kit
Retail Price \$1,050.00
- “Enhanced Classic” Round 2 ¼” Panel Mount AOA Kit
Retail Price \$1,050.00

2 “ENHANCED ULTRA” DISPLAYS

(Horizontal Display) (Vertical Display)
 (2.50”L x 0.75”W x 1.00”D)

Kit Pictured with Ultra 2 ½” Vertical Display

The “Enhanced Ultra” line of AOA display kits have the same great features as the “Enhanced Classic” in a smaller more compact package. Kit features an inline display disconnect connector, a direct stereo connection of a built-in audio interface system for multiple selectable tones or voice warnings. 16 (5mm) ultra-bright, colored LED readout of available lift when calibrated to the aircraft. 2 versions of the “Enhanced Ultra” kits are available in a vertical and horizontal bar graph and come with all parts needed to install in most aircraft without modifications.

- “Enhanced Ultra” Vertical 2 ½” AOA Kit
Retail Price: \$1,300.00
- “Enhanced Ultra” Horizontal 2 ½” AOA Kit
Retail Price: \$1,300.00

“ENHANCED LEGACY” AOA DISPLAY

(2.50”L x 0.80”W x 1.25”D)

Kit comes Standard with Instrument Panel Mount Brackets

The “Enhanced Legacy” line of AOA display kits utilize ultra bright LED driven colored segments to give the pilot AOA readout when calibrated to the aircraft. Kit features a direct stereo connection of a built-in audio interface system for multiple selectable tones or voice warnings. The “Enhanced Legacy” display is housed in a billet aluminum case and comes standard with panel mount brackets. Additional glare shield mounting options allow for the display to be mounted above the glare shield in the pilot’s peripheral vision. Kit comes complete with all parts, documentation and connectors prewired for simple assembly.
